Expected Relationships with Y-DNA STR Matches

The expected relationship between you and your Y-chromosome DNA (Y-DNA) match is dependent on both the number of markers you have tested and the genetic distance. The chart below shows the interpretation of your relationship at each testing level (Y-DNA12, Y-DNA37, etc.) for relevant genetic distances.

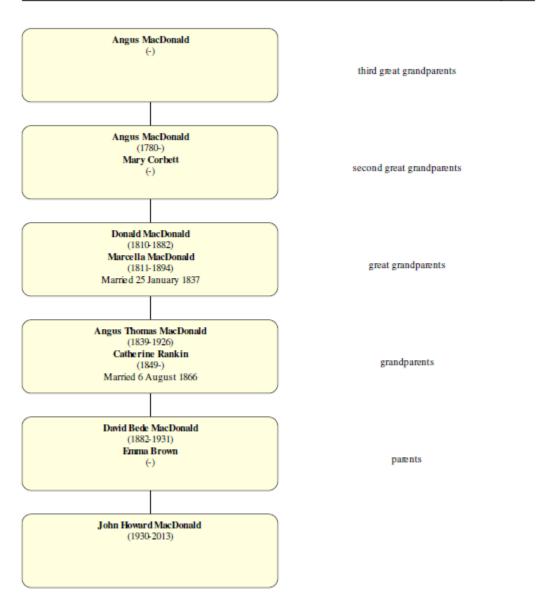

For example, if you and your match have both tested at the Y-DNA37 level and are a 36/37 match, this is a genetic distance of one. You are then considered tightly related.

	Y- DNA12	Y- DNA25	Y- DNA37	Y- DNA67	Y- DNA111	Interpretation
Very Tightly Related	N/A	N/A	0	0	0	Your exact match means your relatedness is extremely close. Few people achieve this close level of a match. All confidence levels are well within the time frame that surnames were adopted in Western Europe.
Tightly Related	N/A	N/A	1	1-2	1-2	Few people achieve this close level of a match. All confidence levels are well within the time frame that surnames were adopted in Western Europe.
Related	0	0-1	2-3	3-4		Your degree of matching is within the range of most well-established surname lineages in Western Europe. If you have tested with the Y-DNA12 or Y-DNA25 test, you should consider upgrading to additional STR markers. Doing so will improve your time to common ancestor calculations.
Probably Related	1	2	4	5-6	6-7	Without additional evidence, it is unlikely that you share a common ancestor in recent genealogical times (one to six generations). You may have a connection in more distant genealogical times (less than 15 generations). If you have traditional genealogy records that indicate a relationship, then by testing additional individuals you will either prove or disprove the connection.
Only Possibly Related	2	3	5	7		It is unlikely that you share a common ancestor in genealogical times (one to 15 generations). Should you have traditional genealogy records that indicate a relationship, then by testing additional individuals you will either prove or disprove the connection. A careful review of your genealogical records is also recommended.
Not Related	3	4	6	>7	>10	You are not related on your Y-chromosome lineage within recent or distant genealogical times (one to 15 generations).

MARYVALE, Antigonish County

Settlement N.W. of Antigonish.

Known as Malignant Brook because of its location on this brook until the name was changed to Maryvale by statute in 1871.

Among the early settlers were Allan MacDonald and John McGillivray, piper, son of Andrew McGillivray of Dunmaglass, and Roderick McDougall (Ruaridh Cleireach). Among the first grantees in the district were Donald and John Cameron, Angus Boyd, Hugh and Angus McDonald, Archibald McDougald, John Gillis, Sr. Hugh and John McGilvray, Roderick McDougald, Donald, John, Alex and Duncan McDonald. Robert Murray and Alexander Chisholm. Ronald McKinnon son of John McKinnon, pioneer, bought two hundred acres of forest land at Malignant Brook from a soldier named Angus Boyd and with the assistance of his wife built a log shelter in the wilderness.

Alexander McDonald was teaching at Malignant Brook in 1828 and later John MacGillivray, piper, was teaching in the old log schoolhouse where one of his pupils was Ronald McDonald, later Roman Catholic Bishop of Harbor Grace, Newfoundland.

The first log school was located on what was called the Old Gulf Road, but other school-houses were built on the west side of the brook. In 1887 the school district was named Maryvale. The North Shore Consolidated School was built in the section in 1963.

James G. Ross was postal way office keeper in 1871.

In 1898 the settlement had one church and one store and a population of 170.

The population in 1956 was 87.

Little Neil MacDonald	Donald MacDonald Emmigrated to Aus 1838	Donald MacDonald
Neil MacDonald	Angus MacDonald (Mary Corbett, Porta <u>Bhata</u>)	Duncan MacDonald
John MacDonald - NS 1790's	Angus Mor MacDonald (Porta Bhata, Scotland)	Donald MacDonald - NS 1790's

Donald of Stephen/Rick's line, Alexander John & Duncan, are among the 1st grantees in the early 1790's at Malignant Brook.

The settlers built their first catholic church, St. Margaret's of Scotland in Arisaig, 1790/1792. Geographically, Arisaig, Malignant Cove, Malignant Brook & Georgeville are all very close, running into each other. As populations grew in these close pockets, settler families built their own churches – St. George's, Georgeville c 1830 & St. Mary's in Malignant Brook c1840. In this era, a grouping of Scottish families quickly built their church as the center of their activities. In today's economy & with small populations, it's amazing these churches/parishes still exist. In April 2011, St. Mary's in Maryvale (Malignant Brook) was completely destroyed by fire. Within 9 months, the parishioners had rebuilt their church anew – an amazing feat - a testament that the sentiments of those early Scots still lives in today's population in Antigonish county.

From the Glenaladale Settlement in 1772, until the effects of the Passenger Act set in, emigration for Catholic Highlanders was to Scotchfort PEI. Today, standing on the shores along Arisaig, you look across at that Catholic portion of Western PEI, an easy commute across calm waters. To the right & you see nearby Cape Breton with Judique, also springing up in population with Catholic Highlanders. Religious freedom & land were the promise to these early Scot settlers coming to PEI but the arrangement proposed upon their arrival ended up being 99 year leases. As families arrived at PEI in the 1790's, initially they would have to share with their families/friends already there, to survive. Growing families & the unquenched quest for their own land soon had these Catholic Scots leaving to set up the first communities in the land they could see across the water in today's areas of Arisaig & Judique in Cape Breton.

John, Duncan, Donald & Alexander are recognized as Pioneer settlers at Malignant Brook. Donald & Alexander remained in the area. Prior to 1804, John & Duncan relocated to Judique in Cape Breton, selling their 500 acre plot in Malignant Brook to a merchant trading between these communities.

The magic of YDNA has produced some surprises.

- The lineage for Stephen MacDonald & Richard King from Massachusetts connects to the lineage of William C MacDonald from Auld's Cove NS as if they were brothers/first cousins.
- The Lineage for Angus Mor remaining back in Porta Bhata, Loch Moidart Scotland connects to William C's & Stephen/Rick's lineage as brothers/first cousins.
- While John, Duncan, Donald & Alexander came to NS in the 1790's, Angus Mor's family remained in Scotland, until 1838
 when his grandson, Donald, son of Angus married to Mary Corbett, began that family's emigration to Australia.
- John, Duncan, Donald & Alexander were either brothers or first cousins along with Angus Mor back in Porta Bhata, Loch Moidart, Scotland.
